

Bernard, R. M., & Naidu, S. (1990). Integrating research into practice: The use and abuse of meta-analysis. *Canadian Journal of Educational Communication*, 19(3), 171-195.

### **ABSTRACT**

Examines meta analysis as a technique for reviewing literature, with a particular focus on the literature of instructional development. An example using meta analyses to study mastery learning is presented, and a summary of meta analytic studies of instructional variable effects on student achievement is included.
